Informazioni importanti

INFORMATION BELOW IS TAKEN DIRECTLY FROM KEY INVESTOR INFORMATION DOCUMENT

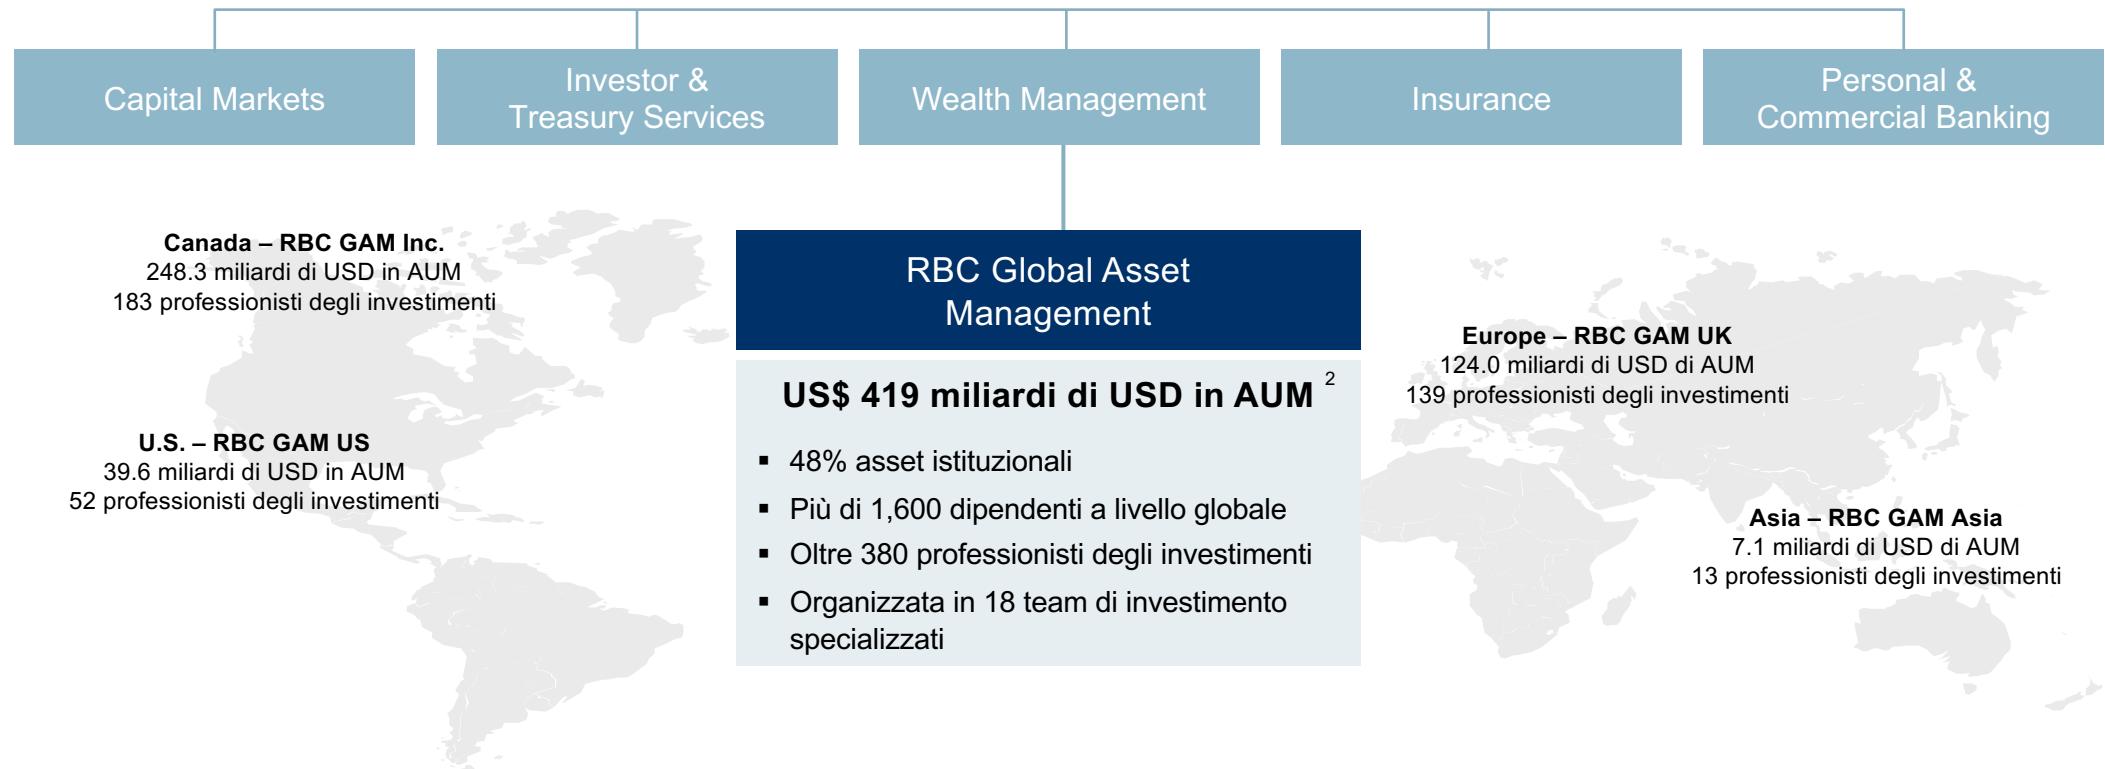

For further terms related to the objective, investment policy and overall risk and reward profile please refer to the key investor information document

- At times, the market for investment grade bonds may dry up, which could make it difficult to sell these bonds, or the fund may only be able to sell them at a discount
- There may be cases where an organisation with which we trade assets or derivatives (usually a financial institution such as a bank) may be unable to fulfil its obligations, which could cause losses to the fund
- BlueBay's ESG analysis can rely on input from external providers. Such data may be inaccurate or incomplete or unavailable and BlueBay could assess the ESG risks of securities held incorrectly
- Investing in emerging market bonds offers you the chance to gain higher returns through growing your capital and generating income. Nevertheless, there is a greater risk that the organisation which issued the bond will fail, which would result in a loss of income to the fund along with its initial investment
- BlueBay could suffer from a failure of its processes, systems and controls – or from such a failure at an organisation on which we rely in order to deliver our services – which could lead to losses for the fund

La nostra opinione sui principali temi di investimento macroeconomici

- I bilanci societari ed i consumi rimangono solidi, il **rallentamento sarà più graduale**. Vediamo tuttavia maggiore debolezza nel settore manifatturiero
- Sarà **difficile osservare trend disinflazionistici** con il prezzo del petrolio in rialzo ed altre commodities ai massimi degli ultimi anni
- La Fed e la BCE sono vicine ai tassi terminali, ma sarà **improbabile assistere ad un calo dei rendimenti**, alla luce della curva dei rendimenti dalla forma invertita ed il messaggio delle banche centrali sui tassi “alti a lungo”
- Per questo motivo, vediamo le **opportunità in USA ed Europa come più tattiche**, con l’obiettivo di sottopesare il rischio tasso qualora il tasso sul Treasury scendesse sotto 3,75% e sovrappesare qualora superasse il 4,3%
- Altrove nell’universo obbligazionario, ci aspettiamo che in **Giappone i tassi possano salire verso l’1%**. In Cina, le misure di stimolo approvate dovrebbero fornire uno stimolo di breve termine, mentre vediamo valore in alcune aree dei mercati emergenti, anche se i tassi USA in risalita stanno riducendo le opportunità di *carry trade*.

The entities noted above are collectively referred to as "RBC BlueBay" within this document. The registrations and memberships noted should not be interpreted as an endorsement or approval of RBC BlueBay by the respective licensing or registering authorities. Not all products, services or investments described herein are available in all jurisdictions and some are available on a limited basis only, due to local regulatory and legal requirements. Please refer to the Prospectus of the fund, the Key Investor Information Documents (KID) and the Packaged Retail and Insurance-based Investment Products - Key Information Documents (PRIIPs KID), if available, or any other relevant fund documentation on our website (www.rbcbluebay.com) before making any final investment decisions. The Prospectus and the PRIIPs KID is available in English and the KIDs in several local languages. No RBC BlueBay fund will be offered, except pursuant and subject to the offering memorandum and subscription materials for such fund (the "Offering Materials"). If there is an inconsistency between this document and the Offering Materials for the RBC GAM UK fund, the provisions in the Offering Materials shall prevail. Any investor who proposes to subscribe for an investment in any of the RBC BlueBay products must be able to bear the risks involved and must meet the respective products suitability requirements. This document is intended only for "professional clients" and "eligible counterparties" (as defined by the Markets in Financial Instruments Directive ("MiFID")) or in the US by "accredited investors" (as defined in the Securities Act of 1933) or "qualified purchasers" (as defined in the Investment Company Act of 1940) as applicable and should not be relied upon by any other category of customer. The investments discussed may fluctuate in value and you may not get back the amount invested. The return may increase or decrease as a result of currency fluctuations. Investment in derivatives may involve a high degree of gearing or leverage, so that a relatively small movement in the price of the underlying investment results in a much larger movement in the price of the instrument, as a result of which prices are more volatile. There are restrictions on transferring interests in the funds. The instruments in which the products invest may involve complex tax structures and there may be delays in distributing important tax information. The funds are not required to provide periodic pricing or valuation information to investors with respect to its individual investments. Unless otherwise stated, performance data is unaudited and net of management, performance and other fees. Past performance is not indicative of future results. Any indices shown are presented only to allow for comparison of the RBC BlueBay fund's performance to that of certain widely recognised indices. The volatility of the indices may be materially different from the individual performance attained by a specific fund or investor. In addition, the RBC BlueBay fund holdings may differ significantly from the securities that comprise the indices shown. Indexes are unmanaged and investors cannot invest directly in an index. This document has been prepared solely for informational purposes and does not constitute an offer or recommendation to buy or sell any security or investment product or adopt any specific investment strategy in any jurisdiction. This document should not be construed as tax or legal advice. This document may contain the current opinions of RBC BlueBay and is not intended to be, and should not be interpreted as, a recommendation of any particular security, strategy or investment product. Unless otherwise indicated, all information and opinions herein are as of the date of this document. All information and opinions herein are subject to change without notice. The information contained in this document has been compiled by RBC BlueBay, and/or its affiliates, from sources believed to be reliable but no representation or warranty, express or implied is made to its accuracy, completeness or correctness. A summary of investor rights can be obtained in English on www.rbcbluebay.com/investorrights. It is important to note that the Fund Management Company may terminate arrangements for marketing under new Cross-border Distribution Directive denotification process. There are several risks associated with investing in financial products. With all investments there is a risk of loss of all, or a portion of the amount invested. Recipients are strongly advised to make an independent review with their own advisors and reach their own conclusions regarding the investment merits and risks, legal, credit, tax and accounting aspects of all transactions.

Gross Performance: While gross of fee figures would reflect the reinvestment of all dividends and earnings, it would not reflect the deduction of

investment management and performance fees. An investor's return will be reduced by the deduction of applicable fees which will vary with the rate of return on the fund. For example, if there was an annualised return of 10% over a 5-year period then the compounding effect of a 0.60% management fee and a 0.20% performance fee would reduce the annualised return to 9.32% (figures used are only to demonstrate the effect of charges and are not an indicator of future performance). In addition, the typical fees and expenses charged to a fund will offset the fund's trading profits. A description of the specific fee structure for each RBC BlueBay strategy is contained in the fund's prospectus.

Net Performance: Net performance figures reflect the reinvestment of all dividends and earnings, and the deduction of investment management and performance fees. In addition, the typical fees and expenses charged to a fund will offset the fund's trading profits. The specific fee structure is detailed in the fund's offering materials and/or prospectus.

eVestment: Rankings change monthly. Return and risk rankings are simply the actual rank divided by the number of observations. Risk measures are calculated based on monthly returns of funds and/or benchmarks. eVestment and its affiliated entities collect information directly from investment management firms and other sources believed to be reliable; however, eA does not guarantee or warrant the accuracy, timeliness, or completeness of the information provided and is not responsible for any errors or omissions.
